

## CAL 9400

940000008

CONTROLLER SSD/RELAY 240V

- Self-tuning of all PID parameters
- Set point value adjustable
- 2 outputs
- Easy to use

### PRODUCT DESCRIPTION

CAL 9400 is an efficient yet compact temperature controller. Features thermocouple, Pt100 (2 wire) and mV input. Easy-to-use autotuning, simple configuration. IP66 rated composition.

### SPECIFICATIONS

|  |                       |
|--|-----------------------|
| <b>Approvals</b>                         | CE, CSA, EMC, UL, FM  |
| <b>Digit Height</b>                      | 10 mm                 |
| <b>Digital signal in</b>                 | No                    |
| <b>Frequenze</b>                         | 50-60                 |
| <b>IP Class Front</b>                    | IP66                  |
| <b>Material Protection</b>               | Polycarbonate         |
| <b>Mounting</b>                          | Panel mount           |
| <b>Number Of Digits</b>                  | 4                     |
| <b>Output</b>                            | Logic (SSR), 1x relay |
| <b>Panel size</b>                        | 48x48 mm              |
| <b>Power Supply AC max</b>               | 264 V                 |
| <b>Power Supply AC min</b>               | 90 V                  |
| <b>Temperature resistance housing to</b> | 50 °C                 |
| <b>Weight</b>                            | 130 g                 |
