

2 TOOL STATION WITH ELECTRIC PUMP DDSE/DDVE

DDSE-2B

DDSE-2B Rework station with Electric Pump

- For all types of SMD components
- Through hole desoldering capability
- Pad cleaning
- +90 °C...+450 °C
- Peak power 150 W / tool

PRODUCT DESCRIPTION

The DDE manages up to 2 tools simultaneously and is fully compatible with 10 different JBC tools. Extremely versatile station to meet the highest standards. Two distinctive models, DDSE features a electric pump, whereas DDVE utilizes a pneumatic one.

Both stations provide the best soldering quality and feature intelligent Sleep & Hibernation modes help to extend the tip service life.

DDVE / DDSE offer great benefits such as high level of customization, full control of soldering processes and remote work management.

SPECIFICATIONS

Input fuse	2 A
Operating temperature	10-40
Output peak power	150 W
Supply voltage	230 V AC
Weight	9,25 kg

DR Desoldering iron

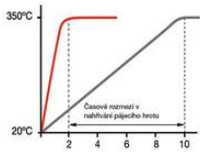

DS Micro desoldering iron

RM Rework station

Průběh nahřívání taveniny

Průběh pálení
